

Bolt on Hooks

Bolt on Hook (Small)

This is a general purpose hook and will suit most applications.

Ideally installed by drilling through the bucket. It will allow you to attach a shackle and chain to lift heavy objects.

Hole is 25mm and will fit a standard 4.7T 4wd recovery shackle

CNC Plasma cut from 10mm 350 Grade steel

Designed to fit the BX (BT603, BT602, BT601) Backhoe buckets

Bolt on Hook (Large)

This is a general purpose hook and will suit most applications. Ideally installed by drilling through the bucket to allow the load to be placed over the pins. It will allow you to attach a shackle and chain to lift heavy objects. Plate is CNC Plasma cut from 8mm 350 Grade steel. Supplied with M12 Grade 8.8 Bolts and Nyloc nuts.

Available in Horizontal and Vertical orientations. Comes in 1, 2 or 3 units /pack.
