

BX 2 Piece HST Fan & Guard

BX 2 Piece HST Fan & Guard

The HST fan fits all Kubota BX tractor models. This fan replaces the Kubota white hydraulic fan that is attached to the drive shaft, and is a direct replacement for Kubota part no K2561-14250 . It has an improved design that allows for easy and much faster replacement without splitting the driveshaft on the tractor.

There are two products of BX HST Fan. One made from PETG plastic and a more flexible polyurethane fan . Both are a 2-part design with a locking ring, all parts are included for install. The fan also comes with a complete installation manual and install videos on the Art in Metal You Tube Channel.

For tractors prior to the BX 50 series there is a small adaptor (pictured below), and this option can also be purchased on our web-site.

BX Fan Guard. Built from tough 3mm steel and finished in durable black powder coating, this guard protects your fan from damage. The Guard provides full access to the PTO shaft.

Installation is quick and easy. Compatible with mid mount mowers (MMM)– no need to remove the mower to install. Fits all Kubota BX Tractors.

Both the fans and the guard 100% Australian made and designed by Art in Metal.
