

Weld on Hooks

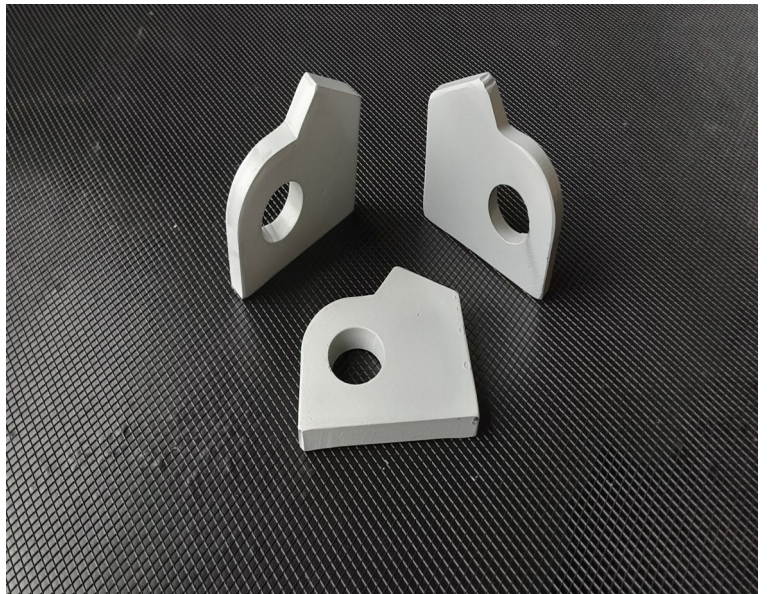

Weld on 4in 1 Bucket Hooks

This bracket is designed to suit the BX23 4in1 Bucket. It fits under the top lip of the BX23S 4in1 Bucket and is welded in place.

It will allow you to attach a shackle and chain to lift heavy objects. As the lift point is above the bucket pins, maximum lift can be achieved by passing the chain through the open bucket.

Hole is 25mm and will fit a standard 4.7T 4wd recovery shackle. Painted to prevent rust during shipping.

Weld on Hooks

This is a general purpose bracket. It is designed to be welded in wherever a hook mount is required. It can also be drilled and bolted into position.

Hole is 25mm and will fit a standard 4.7T 4wd recovery shackle

CNC Plasma cut from 350 Grade steel. Painted in primer to prevent rust during shipping.

Both come in 1, 2 or 3 units /pack.
